

THE ULTIMATE AND MOST COST-EFFECTIVE ATM PROTECTION SYSTEM **ANTI-RAM RAID PLINTH (ARRP)**

The Anti-Ram Raid Plinth (ARRP) is designed and manufactured (patent number GB2517601) by Loktec Security Group to stop ram raid attackers removing ATMs.

The ARRP offers a visual and physical protection system which is readily available for all makes and models of ATMs – with its unique tamper proof design. The ARRP is tested independently to resist attacks exceeding 350 Kilo–Newton of dynamic impact load using heavy plant such as JCBs and large 4X4 vehicles.

KEY POINTS

- UK designed and manufactured
- Independently tested to BS6399
- Designed to resist dynamic impact loads exceeding 350Kn
- Unique patented tamper proof design
- Visual and physical deterrent
- Approved by ATM vendors, UK and Global banks
- For all ATM models
- Heavy duty construction
- Non-invasive installation
- Patent number GB2517601
