SAFE - TRACK

Protects your ATM and cash against attack. Loktec TPS tracks the stolen machine and pinpoints the location.

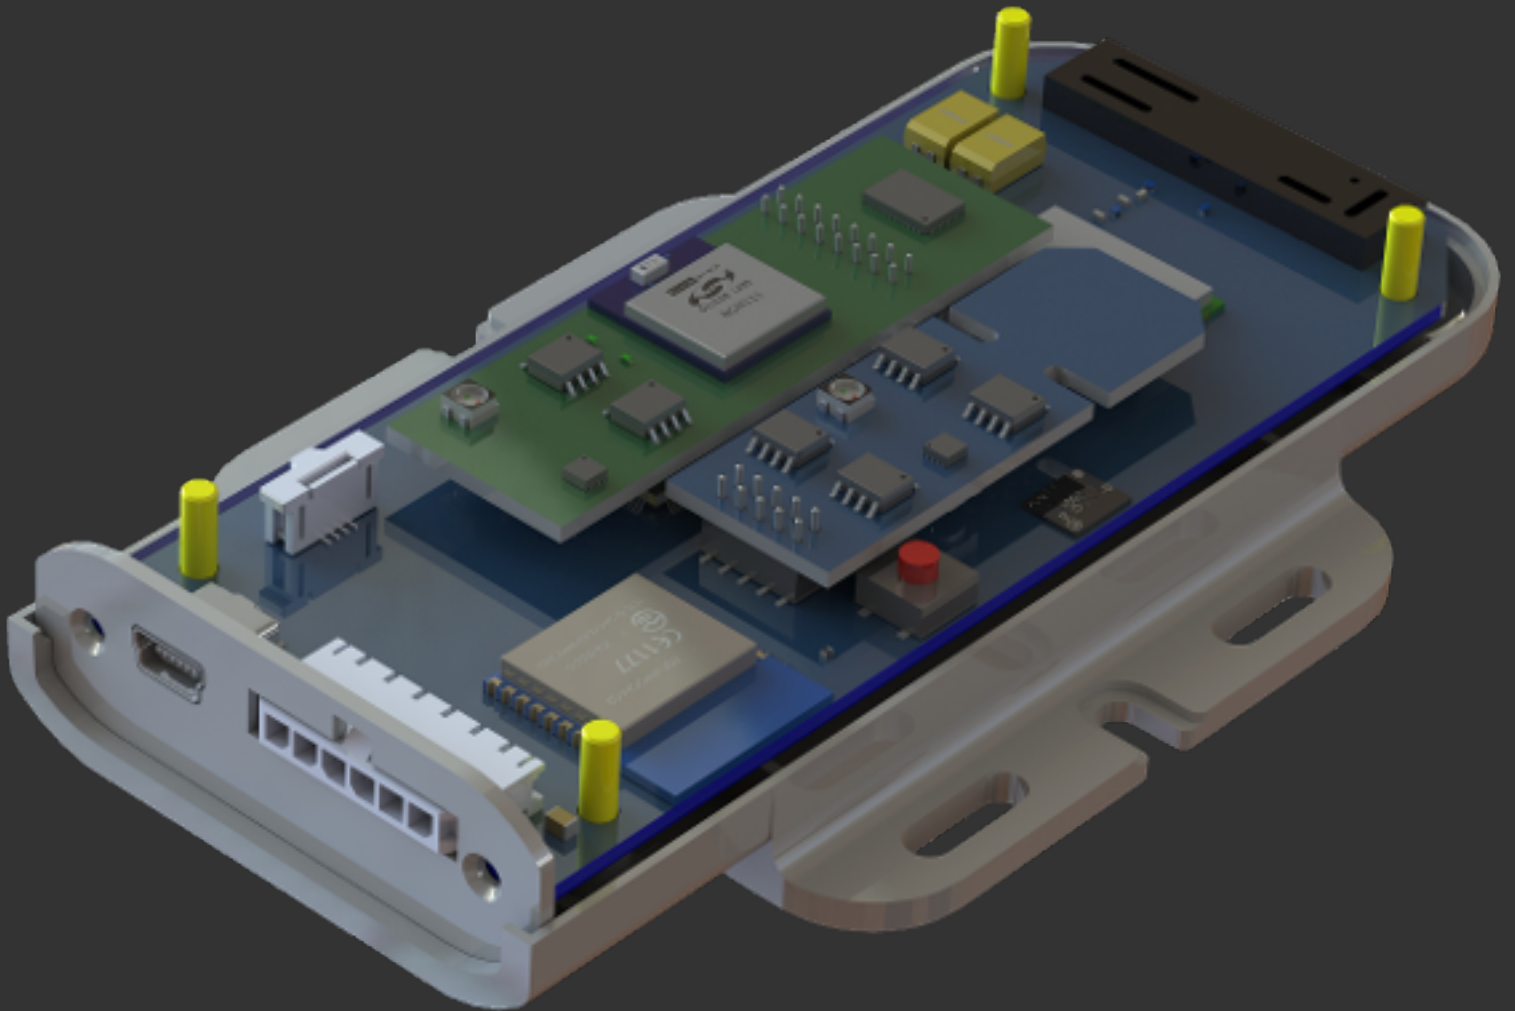

Loktec TPS ATM Tracker is a fully automatic system that immediately raises the alarm if the ATM is attacked.. ATM Tracker will then track the ATM, cash and perpetrators in real time.

SAFE - TRACK

How it work

4G ATM Tracker automatically triggers an incident alert to police and the bank. The tracking information is accessed by local law enforcement

allowing safe pursuit and apprehension.

KEY POINTS

• Automatically detects attack via tilt, motion, and sound.

• Location updates every 6 seconds to allow precise positioning tracking

• GPS, GPRS and Wifi tracking provide precise location reporting

• Reliable performance ensured via daily Device status check through GPRS connection.

• Secure website for live tracking ensures safety of client information

• Text and email notifications

• Stores data if cellular signal is lost to preserve track data

• RF to pinpoint final Device location

• Dial-in and eavesdrop on the area around the ATM to confirm an attack in progress

• Heat detection

• Vibration detection

• Remotely control the ATM itself, cut or restore its power in the event of a cyber attack

• Can be integrated into third party devices.
